**CLASSIC  
HERRINGBONE  
IN MODERN STYLE**

## HERRINGBONE FLOORING CONSTRUCTION

### Wood protection system

UP to 7 layers of UV-hardened  
acrylic lacquer  
or a system of natural oil.

#### Surface layer

Selected European wood of the  
appropriate thickness, protected with  
a lacquer or oil finish.

#### Middle layer

Coniferous layer arranged laterally to  
the surface and a bottom layer.  
Such construction limits the natural  
movement of the wood and prevents  
gaps, cracks and squeaking - even  
in constantly changing weather  
conditions.

#### Bottom layer

Coniferous wood arranged  
laterally to the middle layer reduces  
the natural work of wood.

### CROSSLOCK joint

Crosslock is the latest joint  
designed by Barlinek, which  
facilitates the arranging of the  
Herringbone Pattern in a clean,  
quick and easy manner.  
Its profile allows the installing of  
the above-mentioned pattern  
without the need for both the  
right and left side floorboards  
at the same time.\*

The advantages  
of the Crosslock joint

- A clean, quick and easy assembly  
without using special tools
- An arrangement system which does  
not require using both  
right and left floorboards
- No risk of damaging  
the joint during assembly

\*Detailed information regarding the installation and use of the Herringbone Pattern  
can be found in the assembly instructions and the guarantee certificate.

Distribuitor în România - Gada Ceramic București

**Oak  
Toffee  
Herringbone  
Piccolo**

Single plank oak floor immersed in shades of gold and warm brown. The slenderness of the boards coated with natural oil was achieved by 4-sided bevelling. The uniqueness and abundance of the wood was emphasized in the brushing process.
